5500-Series API Coupler Locking Device

The Lockout/Tagout standard requires the adoption and implementation of practices and procedures to shut down equipment, isolate it from its energy source(s), and prevent the release of potentially hazardous energy while maintenance and servicing activities are being performed.

Application

• Prevents coupling or opening of the coupler while maintenance and servicing is being performed

Materials

• Non-sparking aluminum with red anodize construction

Features

- Tamper-proof pivot bolt
- Locking hasp can accommodate up to three locks
