

The Right Connection®

# Heavy Duty 6 Port Air Interlocks

*Robust, heavy duty construction*

## Applications:

The new 5006 series 6 Port Air Interlock allows for the control of two separate air circuits with the single actuation of a single plunger. This new design solves the problem of slow brake release and the challenge of bent buttons and shafts.

## Features:

- large air ports allow for high air flow and the fast setting and release of brakes and air operated valves
- 3/4" diameter stem resists bending
- roller end allows for various angles of engagement
- Baylast™ seal standard
- standard 1/4" NPT air port configuration
- stainless screws included
- available in large button, roller point and extended paddle engagement ends
